**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 14-17,20,21 are rejected under 35 U.S.C. 102(b) as being anticipated by Huegle (2004/0021763).

Regarding claim 14, Huegle discloses a housing for a printer of a motor vehicle tachograph [0001] comprising:

- a basic housing body [housing 2]
- a support arranged to moved at least partly out of the housing [support bridge 41, Figures 3 and 4 show that the support bridge is capable of being separated from the body], the support having at least one guide [guides 45-48] having:
  - at least two first guide elements arranged on and fasted to the support on two opposite sides [guides 45-48 are arranged on support 41 on opposite sides; Figure 4]
  - two second guide elements [guides 32-35], corresponding to the first guide elements on the support [Figures 3 and 4], arranged on both sides of the support such that the support is guided by means of the guide during a movement in or against an insertion direction [0027; support bridge can be

inserted into cutout and the guide elements align and provide a guide for the motion of the support relative to the cutout], and

- wherein the second guide elements are fastened to a central base which substantially overlaps the support, at least periodically [guide elements are fastened to cutout 26 (central base support) and support 41 overlaps cutout 26 at the guide sections], in that the first guide elements and the central base support are fastened and braced against one another to the basic housing body by means of fastening elements [Figure 5 shows support 41 and cutout 26 being fastened by screws].

Regarding claim 15, Huegle discloses a printer and media unit [0025].

Regarding claim 16, Huegle discloses a printer unit fastened to the base support [0025-0026].

Regarding claim 17, Huegle discloses the support arranged partially in the manner of a drawer [Figure 5; support 41 is inserted into cutout 26, much like a drawer].

Regarding claim 20, Huegle discloses a media unit comprising a receptacle for a paper roll and a feed unit [0025].

Regarding claim 21, Huegle discloses a support [41] to be moved relative to the printing unit and in the insertion into an operating position and counter to the insertion direction out of an operating position [Figure 5 shows the operating position; Figures 3 and 4 show a non operating position; the insertion direction is toward the inside of the printer from the outside].

***Allowable Subject Matter***

3. Claims 18-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***
